BG statistics card

Here you can see how many tests have been performed over a period of time, the average amount of tests per day in the time range selected, mean glucose levels and variability as well as hypos. If the BG statistics card reads "No data available," this means that no patient data within the selected time period is available. It is likely that a data upload may be required in order to provide results.

Special Notes on Statistics:

- 1. Statistics shown align to specific time period that is selected.
- 2. Statistic availability will depend on the type of device(s), and if the features on the device are used or not used by the patient.
